

IT Security

Intelligence. Strength. We've got IT.

Our security practice brings more than a 100 years of combined information security experience. We are experts in helping our customers build their own security programs in order to protect their organization. We bring a blend of business and technical experience to every security project and maximize our client's investment.

Security risks are at an all time high. Your organization needs a methodical approach to security as well as next-gen technology. It all starts with a free consultation with EQ's security team in Chicago.

Maintaining the security of your business is becoming tougher and more important than ever. Don't expose your organization to litigation, fines or the headlines. Contact EQ today for a free consultation to discuss your organization's security.

Services:

- Security Assessments
- Vulnerability Scanning
- Penetration Testing
- Firewall & IPS
- PCI Compliance
- HIPAA Compliance

The EQ security practice methodology

is based off of a blend of industry standard frameworks from many verticals including Healthcare, Manufacturing, Finance and Federal.

A security program is a continuous cycle. EQ's interpretation of this cycle.

Security Assessment

Working collaboratively with our client, this phase provides a valuable insight to an organization's security posture and risk temperament. It includes vulnerability scanning. The result of this phase is a high-level proposed road map and recommendations for remediation.

Architect

A security strategy is decided upon, policies and procedures are drafted, control frameworks are selected and solutions are designed. This is all based on the organization's needs and risk tolerance as the outcome of the security assessment.

Implement

Policies and procedures and any upgrading of the infrastructure or controls is completed. Our Project Management Office (PMO) assures the projects are completed on-time, on-budget and with high quality.

Manage

A management and security support plan is put into place according to the customer's unique requirements and technology. Our Security Operations Center (SOC) is ready to manage your alerts with your incident response plan handy. Network Penetration Testing and Vulnerability Scanning will help you validate your controls and maintain compliance.

With experience in assessing IT, consulting, and managed services, EQ is equipped with the expert services and solutions to move your business ahead.
